SKILLS

- **Programming skills**: Python, C++, R, Java, .Net, C, Node.js, PHP
- **Databases:** Oracle: PL-SQL, SQL, MySQL, NoSQL, MongoDB, SQL Server 2005/2008
- **Framework:** WCF, WPF, MVC, AJAX, AngularJS, JUnit
- **Web technology:** HTML5, CSS3, JavaScript
- **Operating Systems:** Linux, macOS, Unix, Windows
- **Other:** Hadoop, Flask, Informatica, TIBCO EMS, shell script, Git, Agile and waterfall methodology

PROFESSIONAL EXPERIENCE

CGI | Consultant| Columbia, USA **June 2017 – Current**

- Working on Informatica Workflow Monitor/Manager and Power center developer such as configuring the DB, Checking session and Workflow logs and motoring the workflows.
- Enhance and work on the Unix Shell Scripts and ksh/bash shell to automate backend report and other jobs.
- Scheduling jobs on AutoSys scheduler including monitoring and admin task on the UNIX servers.
- Ensured compliance of client SLAs and creating reports using automated tool (BOXI) for management.

UNIVERSITY OF SOUTH CAROLINA | *Graduate Assistant* | *Columbia, USA* **Feb 2016 – May 2017**

- Developed a high performance computational tool based on python and R to effectively mine the spatiotemporal patterns of people's experience, needs and opinions.
- Performed descriptive and multivariate statistical analyses of the processed twitter data using python libraries numpy, skfuzzy etc.

UNIVERSITY OF SOUTH CAROLINA | *Graduate Teaching Assistant* | *Columbia, USA* **Jan 2017 – Dec 2017**

- Instructed and assisted students in the Algorithm Design Lab for development of algorithms and computer programs involving data structures using Java.
- Involved in teaching front end web designing involving HTML5, CSS3, JS and MIT App inventor to students and help them to understand the fundamental concepts related to computer programming.

Saffron e-Services | *Project Intern* | *Noida, India* ***May 2013 – June 2013***

- Assisted a developing team working on a project titled "Social world" that connected social networks and e-learning.
- Scrutinize & anatomize C# implemented projects to comprehend software development strategies and approaches.
- Used SQL database and ADO.net for its storage and connectivity purposes, Worked on GUI Part of various models with the help of ASP.Net and AJAX
- Tested & debugged various modules to find out bugs and removed them under the guidance of the testing team.

Silicon Star Info India Private Ltd. | Software developer Intern | *Jaipur, India* **June 2012 – July 2012**

- Worked as a developer intern with a team to automate some of the company payroll management department work.
- Developed various modules including payroll computation and reports generation module in Visual basic and C++.
- Optimized code of the modules to reduce the execution time and maximize the efficiency.

EDUCATION

Master of Engineering in **Computer Science and Engineering** **May 2017**
University of South Carolina - Columbia **| GPA 3.4**

Bachelor of Technology in **Computer Science and Engineering** **May 2014**
Amity University - India **| GPA 3.73**

CERTIFICATIONS

- Certificate of Graduate Study in Information Assurance and Security

PROJECTS

- **MEETING ENGAGEMENT AND TRACKING SYSTEM:** Meeting organize and track system for employees implemented using agile scrum process in Java, MySQL database, Emma and Junit.
- **COMPILER CONSTRUCTION:** Designed and implemented a C Compiler (and assembler into x86) on Linux 32-bit architecture using flex and bison.
- **APP DEPLOYER USING DOCKER AS PAAS (PLATFORM AS A SERVICE):** Docker based application implemented using python for handling application related deployment on virtual environment on cloud.
- **MOTEL RESERVATION SYSTEM:** Web based J2EE application that maintain organization online identity and helps to serve their client along with automation of assets, data maintenance task and bill processing system
- **CLIENT SERVER MESSAGE EXCHANGER:** C# based application that multicast a message between users in an environment
- **SPATIOTEMPORAL PATTERNS TOOL:** Developed a tool using python, R and packages numpy, mathplotlib, skfuzzy, wordcloud to predict the behavior or reaction of people on social media during any event or activity.

AWARDS AND EXTRACURRICULAR

Scholarships: Merit based Scholarship of 75% tuition for graduate school from University of South Carolina.
Awards: Won Gold medal in the state level competition for website design and programming.
Praised and Awarded medal for software implementation in the competition for an organization.
